

Steel WIRE

“crafted Today for a better Tomorrow”

ABOUT OUR FACILITY

Patil Group's Wire Division, strategically located in **Chandrapur, Maharashtra**, stands among India's most advanced steel wire manufacturing facilities, with an impressive annual production capacity of **48,000 tonnes**. Supported by a highly skilled workforce of over 200 professionals, the plant is committed to achieving excellence in manufacturing.

Equipped with state-of-the-art technologies—including automatic tunnel-type acid pickling systems, continuous patenting furnaces, and high-speed wire drawing lines—the facility produces a comprehensive range of steel wires from 0.20 mm to 8.00 mm in diameter, ensuring consistent quality and reliable performance.

Our goal is to be the supplier of choice, offering premium products, timely deliveries, and responsive technical support that help customers improve productivity and reduce operational costs. Guided by the principles of innovation, sustainability, and customer-centricity, Patil Group's Wire Division remains dedicated to delivering superior value, strengthening partnerships, and contributing to the growth of India's industrial and infrastructure sectors.

1	SPRING STEEL (SM,DM,SH,DH)	IS-4454-2001 (PART 1)	DIN-17223-PART 11984 (GRADE - A,B,C) EN-10270-1:2024
2	CRIMPING WIRE (SL)	IS-4454-2001 (PART 1)	
3	UPHOLSTRY SPRING WIRE	IS-2589-1975	
4	3X3 UNCOATED STRAND FOR PC	IS-6006:2014	
5	PRESTESSED CONCRETE WIRE	IS6003:2010	

Our Wire Plants Are Iso-9001:2015 Certified With Quality Management Systems

Inbuilt Quality Checks At Stages From Raw Materials To Wire Drawing, Carefully Designed Drawing Process To Ensure Optimum Properties, Uniform Coil Weight, Traceability Of Coils

Attributes Tested - Size, Breaking Load, Tensile Strength, Bends, Torsion And Any Other Customer Specific Requirements
Quality Report - Each Shipment Is Accompanied By A Test Certificate.

SPRING STEEL WIRE

PC WIRE & STRAND

OUR STRENGTHS

- Fully automatic acid pickling (tunnel type) confirms complete scale removal which ensures consistent lubricant coating and uniform wire surface.
- Larger coil weight of 2MT (>6mm diameter) means less stoppages & higher productivity for spring manufacturing. Long run production also reduces variation in spring length & spring diameter.
- Casting diameter of 1000 mm (>6mm diameter) generate lower strain ageing in wires, which helps in perfect spring pitch & exact spring length.
- Wide size range of 0.2mm dia to 8mm dia covers majority of product basket.

LEGACY

Since its inception, Patil Group has been a catalyst for innovation and progress, contributing significantly to the growth of Indian Railways and the nation. Building on this strong legacy, the Group has diversified its operations beyond its traditional strengths, expanding its expertise in wire drawing to cater to the automobile, power distribution, and construction industries. Through this strategic diversification, Patil Group continues to deliver advanced wire products, reaffirming its commitment to innovation, quality, and the dynamic needs of India's industrial sector.
